City of Grandview

Snow Route Map

Colored lines show various Snow Routes across the City of Grandview. These streets are all marked with emergency snow route signs and are serviced first during any winter snow event.

All other streets are serviced beginning after snow fall stops and are termed "district streets". District streets are only serviced when more than 4-inches of snow accumulated on them.

Note that I-49, its Frontage Roads as well as Mo150 are all maintained by the Missouri Department of Transportation.
